KRIEGER PUBLISHING COMPANY

## Titles of Distinction by Krieger Publishing

### GENUINE WORKS OF HIPPOCRATES

by Francis Adams

Always welcome because its message has remained true and alive through 2500 years, this book excels in complete descriptions of the onset, course, and outcome of diseases treated today. This true medical bible will interest, if not fascinate, all students of medicine both general and specific.

Orig. Ed. 1939, Reissue Ed. 1972 • 384 pp.  
ISBN 978-0-88275-002-6 • \$57.50

### MAY'S MANUAL OF THE DISEASES OF THE EYE: For Students and General Practitioners

by James H. Allen

This monograph is a concise, practical and systematic manual on the subject for the student and practitioner. The volume is sufficiently comprehensive, yet of limited size. Space has been allotted as the necessities of the readers require, estimated by an extensive experience in teaching. A section on the toxic effects of general medication on the eye has been added. The illustrations adequately elucidate the text, and the color plates enhance the utility of the monograph and leave nothing to be desired.

Orig. Ed. 1968, Reprint Ed. 1974 • 442 pp.  
ISBN 978-0-88275-190-0 • \$64.00

### CRIMINALITY AND ITS TREATMENT: The Patuxent Experience

by Francis L. Carney

This text explores the psychology of criminality and its relationship to the treatment process, particularly with regards to the psychosocial dynamics of the prisoner society. It also includes the outpatient treatment of probationers and parolees. Two special problems addressed are the treatment of addictions and pedophilia. Generally, the treatment of criminality is related to the treatment of all the severe personality disorders.

Orig. Ed. 1989 • 168 pp. • ISBN 978-0-89464-348-4 • \$30.00

### The LIFE TABLE AND ITS APPLICATIONS

by Chin Long Chiang

The statistical theory of the ordinary life table is presented here, with a new life table where the time intervals are subject to variation. A brief summary of methods of life-table construction and related topics, such as measures of mortality and adjustment of rates, are also included. The book has an extensive coverage of applications of the life

table to various practical areas. These areas include medical follow-up studies, survival and stages of disease, fertility and human reproduction, duration of marriage and widowhood, antenatal life table, and ecological studies.

Orig. Ed. 1984 • 336 pp. • ISBN 978-0-89874-570-2 • \$61.25

### SNAKE VENOMS AND ENVENOMATIONS

by Jean-Philippe Chippaux

Translated by F.W. Huchzermeyer, Orig. French Ed. 2002

Snakes responsible for severe envenomations are considered a real public health problem, especially in tropical countries. Yet, snake venom, which is made up of hundreds of specific substances, is used more and more in biomedical research and as a diagnostic or therapeutic tool. This text first presents a synthesis of the principal discoveries on venoms and envenomations. Then paleontology and classification of snakes as well as the biochemistry and toxicology of venoms are simply and precisely described to explain the theoretical basis of the envenomation and its treatment. Knowing the biology and behavior of snakes leads to a better identification of the circumstances of snakebites and thus supports prevention efforts. Recommendations and algorithms of treatments are proposed. This reference also lists all the antivenins produced in the world and the antivenomous plants with their therapeutic properties.

First English Ed. 2006 • 300 pp. • ISBN 978-1-57524-272-9 • \$77.25

### FUNDAMENTALS OF SPACE LIFE SCIENCES 2 VOL. SET

Edited by Susanne E. Churchill

Foreword by Heinz Oser, M.D.

*Fundamentals of Space Life Sciences* is the first comprehensive teaching text to be published in the space life sciences. Designed primarily to support coursework at the advanced undergraduate and graduate levels, this two-volume set is also a state-of-the-art reference text for those desiring a broad overview of the space environment, response of living systems to spaceflight, psychosocial issues of spaceflight, and life support systems. Of particular interest is Section II: Response of Living Systems to Spaceflight. In this section, each chapter is organized to provide both a functional introduction to the physiologic system under consideration and a discussion of how spaceflight affects that system. Unlike previous treatments of the space life sciences, *Fundamentals* has relied primarily on the academic community engaged in space-related

research for its material. As noted by Dr. Heinz Oser, chief life scientist, ESA, in the Foreword, *"This book deserves a wide use. I am convinced that it fulfills its intended goal to educate the coming generation appropriately such that it will further life sciences research in space on a well-informed basis."*

Orig. Ed. 1997 • 398 pp. • ISBN 978-0-89464-051-3 • \$160.75

### SIGN LANGUAGE And The HEALTH CARE PROFESSIONAL

by *Debbie L. Cole*

Beginning by eliminating many of the misconceptions people have regarding deaf people and communication with them, this book explains and illustrates basic American Sign Language for medical purposes. True situations are included to emphasize the problems which arise with miscommunication and a lack of knowledge of deaf people and their culture. The word *deaf* is inclusive of any and all hearing impairments because of the language barrier and the cultural pride involved. Cultural aspects that have a direct bearing on medical treatment and understanding of the deaf patient are given so the reader may gain insight into this special group of people. Information is given for assistance in obtaining qualified interpreters in accordance with the laws and the guidelines for health care facilities. The glossary gives the reader clear and precise definitions for many terms used in working with the deaf.

Orig. Ed. 1990 • 92 pp. • Paper • ISBN 978-0-89464-417-7 • \$19.50

### ATLAS OF HUMAN SEX ANATOMY

by *Robert Latou Dickinson*

One of the best known technical atlases has previously been available only to registered doctors and medical schools. The book includes over 174 illustrated pages.

Orig. Ed. 1949, Reprint Ed. 1971 • 382 pp.  
ISBN 978-0-88275-014-9 • \$87.00

### MEDICINE, MEDIA And MORALITY: Pulitzer Prize-Winning Writings on Health-Related Topics

Edited by *Heinz-Dietrich Fischer*

A complete collection of Pulitzer Prize-winning articles dealing with health-related aspects are contained in this volume. It starts with an introduction on the history of the Pulitzer Prize system and the importance of the health-related topics that were honored during the past seven decades up to 1990. Some of the topics covered are general media questions, including media ethics; the destinies of prominent national characters; and medical aspects in foreign countries. A select bibliography covers the three key content areas.

Orig. Ed. 1992 • 264 pp. • ISBN 978-0-89464-692-8 • \$40.25

### VENOMOUS And POISONOUS ANIMALS

by *Anders Edstrom*

The objective of this book is to provide a short review of venoms used by animals to defend themselves or to capture prey. Venomous or poisonous animals are widely distributed throughout the animal kingdom, with birds appearing to be the only large and widespread group in which no venomous species have been discovered. By research in this field we have learned, and will continue to learn, much about animal behavior and physiology. The active venom components, the toxins, have proved to be indispensable tools for studying our own physiological mechanisms. Because of the high specificity of certain toxins it has been possible to resolve important links in complex physiological mechanisms with these interesting substances. This is a valuable reference for biologists, toxicologists, neurobiologists, and pharmacologists.

English Ed. 1992 • 226 pp. • ISBN 978-0-89464-627-0 • \$28.75

### CLINICAL FOOT ROENTGENOLOGY

by *Felton O. Gamble & Irving Yale*

The purpose of this compendium is to offer a concise but comprehensive handbook of clinical foot roentgenology presented in a format for quick reference and simplified study. Profuse use of classical illustrations fortifies the outlined text.

2nd Ed. 1975 • 448 pp. • ISBN 978-0-88275-102-3 • \$64.00

### FUNCTIONAL ELECTRICAL STIMULATION FOR AMBULATION BY PARAPLEGICS: Twelve Years of Clinical Observations and System Studies

by *Daniel Graupe & Kate H. Kohn*

This is the first text to present in detail clinical observations, data, and specific system description, as well as patient use of functional electrical stimulation (FES). FES is employed to enable spinal cord injury patients who are complete paraplegics to stand and ambulate without bracing. The FES system described is the first to receive FDA approval. The text covers twelve years of ambulation experience and over 10,000 hours of actual FES-based ambulation, representing the largest pool of patients and the longest FES ambulation project in the United States (the first ambulation was in January 1982 at Michael Reese Hospital and Medical Center, Chicago). This text is specifically directed at physicians in rehabilitation medicine, physical therapy, and electrophysiology. It should be of interest to neurologists, neurosurgeons, orthopedic surgeons, occupational therapists, and biomedical engineers.

Orig. Ed. 1994 • 210 pp. • ISBN 978-1-57524-028-2 • Paper • \$40.75  
Orig. Ed. 1994 • 210 pp. • ISBN 978-0-89464-845-8 • Cloth • \$49.50

## TIME SERIES ANALYSIS, IDENTIFICATION AND ADAPTIVE FILTERING

by *Daniel Graupe*

The second edition of this text is directed to graduate engineers and applied mathematicians in industry and research laboratories who deal with problems of control, communications, and signal processing in engineering, medicine, geology, and econometrics. The book unifies identification theory, adaptive filtering, control and decision, time series analysis, and signature-discrimination or diagnosis theory. Stochastic convergence theory is reviewed thoroughly, including an outline of thirty-three fundamental martingale and other convergence theorems. Examples of practical microcomputer-based applications from time series analysis, to adaptive filtering of unknown noise from speech in hearing aids, to controlling artificial limbs of amputees via myoelectric signal signature processing are presented in detail.

2nd Ed. 1989 • 438 pp. • ISBN 978-0-89464-315-6 • \$69.25

## FLORENCE NIGHTINGALE: SAINT, REFORMER OR REBEL?

by *Raymond G. Hebert*

The name Florence Nightingale clearly symbolizes the nursing profession. Perhaps no name is better known by modern nurses. She was the powerful force who not only brought reform and improvements to nursing and nursing education but also to more far-reaching fields such as the army and medicine, public health, governmental legislation, statistics, and especially the status of women. The articles selected for this anthology are designed to show the depth and breadth of this remarkable woman.

Orig. Ed. 1981 • 246 pp. • ISBN 978-0-89874-127-8 • Paper • \$21.75

## CLASSICS IN OPHTHALMOLOGY SERIES 6 VOLUME SET

by *Paul Henkind*

Edited by *Paul Henkind*

2nd Ed. 1932, Reprint Ed. 1979 • 3148 pp. • Cloth  
ISBN 978-0-88275-933-3 • \$174.00

2nd Ed. 1932, Reprint Ed. 1979 • 3148 pp. • Leather  
ISBN 978-0-88275-934-0 • \$231.00

## JABLONSKI'S DICTIONARY OF DENTISTRY

by *Stanley Jablonski*

Contained in this volume is a compilation of terminologies and their definitions from all specialties of dentistry and allied fields of science and technology. Some peripheral terms that are considered to be important or of potential interest to dental practitioners, researchers, educators,

students, and auxiliary personnel, are included, as well as some terms no longer in general use, but of historical or etymological interest. Many illustrations and tables complement the definitions and provide maximum information within the framework of a dictionary.

Orig. Ed. 1982, Reprint Ed. 1992 • 906 pp.  
ISBN 978-0-89464-477-1 • \$144.50

## JABLONSKI'S DICTIONARY OF SYNDROMES & EPONYMIC DISEASES

by *Stanley Jablonski*

Gathered in this one volume is the profusion of eponymous and non-eponymous syndromes and eponymous diseases. It is hoped that this effort will in some measure not only give the reader an understanding of the syndromes and diseases listed herein, but also help to unravel the difficulties in communication concerning these entities, a problem implicit in the very proliferation of syndromes.

2nd Ed. 1991 • 680 pp. • ISBN 978-0-89464-224-1 • \$148.00

## The CLINICAL CONSULTATIONS OF FRANCESCO TORTI

by *Saul Jarcho*

In every century, certain men stand out because of their accomplishments and their attention to detail in a specialized field. Such a man is Dr. Saul Jarcho, who graduated magna cum laude from Harvard University, took an M.A. from Columbia University, and entered Columbia's College of Physicians and Surgeons where he obtained an M.D. degree. Interested in history from an early age, Dr. Jarcho has devoted his efforts to the History of Medicine Association and as a Fellow of The New York Academy of Medicine. He is the recognized author of several books and innumerable articles on the history of medicine. Because of Dr. Jarcho's illustrious background and specialized knowledge, The New York Academy of Medicine has joined with Krieger Publishing Company to publish his complete investigative history of Francesco Torti, best known for his 1712 book, published in Italy, which discussed the use of cinchona bark to cure malaria. Torti gathered together over 300 consultation letters to patients who themselves had written for diagnosis and therapeutic advice after describing their symptoms. These reports were not published in the original 1712 edition much less in an English translation. Now, thanks to Dr. Jarcho's skill and experience as a clinical historian and translator, these unique records of the medical practices of the leading Italian clinician of the first half of the 18th century are available for historians and physicians in the 21st century.

Original Ed. 2000 • 944 pp. • ISBN 978-1-57524-144-9 • \$145.00

## CLASSICS OF NEUROLOGY (FROM KELLY'S MEDICAL CLASSICS)

by Emerson Crosby Kelly

This interesting collection of entries from *Kelly's Medical Classics* includes writings by Hippocrates, James Parkinson (Parkinson's Disease), and Sir Charles Bell (Bell's palsy). Students of neurology and psychiatry will find the present volume offers a rich selection of source material and invaluable biographies and bibliographies of writings from great figures of the past in this field.

## CLASSICS OF CARDIOLOGY - 5 PART SET

Edited by Thomas E. Keys, John A.

Callahan, Jack D. Key, Dwight C., & Fredrick A. Willius

This collection of classic works on the heart and circulation contains comprehensive biographic accounts of the authors, tracing the development of cardiology to its present position. Our illustrious forebears in the medical field built their structure wisely. Some of the articles included discuss types of heart defects and diseases and their respective treatments via open heart surgery. Ventricular abnormalities, arterial problems, transplantation, and hypertension are just a few of the subjects discussed in detail, drawn from the collective wealth of knowledge that now exists in the field of cardiology. Comprehensive and technical, this work is geared to the cardiac professional, serving as a guide and reference as well as a history of particulars in cardiac care.

Orig. Ed. 1983 • 1536 pp. • ISBN 978-0-89874-513-9 • \$347.50

---

## TEXTBOOK OF ETHICS In PEDIATRIC RESEARCH

Edited by Gideon Koren

Compiled from the findings of experts from across the globe and addressed at a conference on pediatric research, this book covers all aspects of research ethics, discussing issues associated with conducting medical research on infants and children. Consent and assent, definitions of risk and benefit and a variety of specific pediatric problems are discussed in a systematic way. This book should be part of the library of any academic pediatrician, pediatric nurse or regulatory agency, drug company or researcher dealing with children.

---

Orig. Ed. 1993 • 346 pp. • ISBN 978-0-89464-559-4 • \$46.00

---

## CRITICAL ISSUES In PERSONAL CONSTRUCT PSYCHOTHERAPY

Edited by Larry M. Leitner & N.G.M. Dunnitt

Personal Construct Psychology (PCP) utilizes phenomenological approaches to understanding the person, while appreciating the fact that the person constructs reality through interaction with the environment. In this volume, personal construct clinicians wrestle with some of the most important theoretical and technical issues in the field of psychotherapy today. In so doing, they describe how personal construct theory allows them to understand their clients in unique ways. Therapists interested in humanistic approaches to understanding the person while maintaining theoretical rigor will find the volume most useful.

Orig. Ed. 1993 • 330 pp. • ISBN 978-0-89464-519-8 • \$46.00

---

## A REVOLUTION In The PHYSIOLOGY Of The LIVING CELL

by Gilbert N. Ling

The essence of a major revolution in cell physiology — the first since the cell was recognized as the basic unit of life a century and a half ago — is presented and alternative theories are discussed in this text. Although the conventional membrane-pump theory is still being taught, another theory of the living cell, called the association-induction hypothesis, has been proposed. It has successfully withstood twenty-five years of worldwide testing and has already generated an enhancing diagnostic tool of great power, magnetic resonance imaging (MRI). This volume is intended for teachers, students and researchers of biology and medicine.

Orig. Ed. 1992 • 404 pp. • ISBN 978-0-89464-398-9 • \$61.25

---

## "OUR LORDS, THE SICK" MCGOVERN LECTURES in the HISTORY Of MEDICINE and MEDICAL HUMANISM

Edited by Lawrence D. Longo

Foreword by Philip M. Teigen

"*Our Lords, the Sick*" comprises eighteen essays in medical humanism, the history of medicine, and health care delivery. They are the John P. McGovern Lectures to the American Osler Society during the past two decades. Each of the essays, given by eminent physicians, historians, and educators, are timeless in their relevance to medicine and health care delivery. In many respects they are "lay sermons" on the philosophy and ethics of health care, ministering to the sick, and professionalism. The contributors, from differing backgrounds and with different points of view, discuss social and cultural factors that have influenced the history of medicine and medical humanism.

Orig. Ed. 2004 • 256 pp. • ISBN 978-1-57524-236-1 • \$43.75

---

## PHARMACEUTICAL CALCULATIONS: A Self-Instructional Text

by *Werner Lowenthal*

This superb tutorial text provides the basis of a strong foundation in pharmaceutical practices. Small, readily learned units of information are presented with verification exercises, chapter questions, and solutions. Various types of compounding problems involving mathematical procedures are presented for practical application of the material. Some solutions require conversions between measuring systems. Many problems are solved by the method of "ratio and proportion." Only simple arithmetic is required; the challenge is determining the given, the required, and the necessary steps in between. This is a valuable tool for students of pharmacology and related health sciences, and as a refresher for medical personnel.

Rev. Ed. 1978 • 460 pp. • ISBN 978-0-88275-573-1 • Paper • \$34.50

## TRUE VIPERS: Natural History and Toxinology of Old World Vipers

by *David Mallow, David Ludwig, & Göran Nilson*

This is a comprehensive, detailed reference work on the nine genera and their species in the family Viperidae. The book incorporates the efforts of David Mallow and David Ludwig as well as the up-to-date taxonomy of Göran Nilson. The result is a valuable reference describing the frontier of knowledge of viper taxonomy. Each species account is based on a thorough review of the world literature and includes information on ecology, biology, physiology, toxinology, distribution, behavior, and husbandry. This book is an invaluable reference for professional and amateur herpetologists; for ecologists and environmental scientists; for educators; and for keepers and breeders. The text is supplemented by 71 color plates and includes an extensive bibliography.

Orig. Ed. 2003 • 410 pp. • ISBN 978-0-89464-877-9 • \$93.25

## THE FRAGILE ALLIANCE: An Orientation to Psychotherapy of the Adolescent

by *John E. Meeks & William Bernet*

This classic text has been read and studied by an entire generation of social workers, psychologists, psychiatrists, and other psychotherapists. The new edition is a streamlined version and includes new information and references. The authors have defined the basic facts and skills required for therapists who work with troubled adolescents. The easy-to-read version blends the tried and true fundamentals with important contemporary issues, including juvenile violence, adolescent sex offenders, and cognitive behavioral

therapy. The primary audiences are practitioners, students, and trainees in psychology, social work, pastoral counseling, psychiatric nursing, and psychiatry.

5th Edition Ed. 2001 • 500 pp.  
ISBN 978-1-57524-125-8 • Cloth • \$69.25

## PSYCHODYNAMIC APPROACHES To The ADOLESCENT WITH PANIC DISORDER

by *Barbara L. Milrod, Fredric N. Busch, & Theodore Shapiro*

A clear description of psychodynamic psychotherapy for adolescents with panic disorder is presented with specific problems common to anxious adolescents. The book contains rich clinical examples and illustrates psychodynamic clinical technique for adolescents, as well as for teaching clinicians and documenting a method of treatment to facilitate research. Topics include a description of panic disorder in adolescents and its psychodynamic underpinnings; a detailed assessment of anxious adolescents; an enumeration of psychodynamic conflicts and defenses of adolescents; and an overview of treatment. Other areas of focus are working with families; technical handling of specific problems common to anxious adolescents such as drug use and suicide; transference, working through, and termination; and techniques of combining psychodynamic psychotherapy with other forms of antipanic treatment. Finally, a long and complete case of an adolescent with panic disorder treated with psychodynamic psychotherapy is presented.

Orig. Ed. 2004 • 138 pp. • ISBN 978-1-57524-230-9 • \$27.50

## CHOICES: A Guide to Sex Counseling with Physically Disabled Adults

by *Maureen E. Neistadt & Maureen Freda*

This book aims to provide rehabilitation professionals with the basic information necessary for limited sexuality counseling with physically disabled adults. It is not meant to be a comprehensive textbook on sexuality and counseling but, rather, a practical manual summarizing the essentials for a supportive, informative type of sexuality counseling. The book is formatted for easy use by clinicians during their day-to-day routine.

Orig. Ed. 1987 • 132 pp. • ISBN 978-0-89874-903-8 • \$19.00

**HEROIN ADDICTION – 3 VOL. SET***by Jerome J. Platt*

---

**Orig. Ed. 1995 • 1074 pp. • ISBN 978-0-89464-923-3 • \$116.00**

---

**HEROIN ADDICTION: Theory, Research, and Treatment - VOL. 1***by Jerome J. Platt*

This second edition incorporates new research findings since publication of the first edition in 1976. It comprehensively covers contributions to our understanding of heroin addicts from many disciplines including psychiatry, social work, pharmacology, physiology, criminology, nursing, and sociology, as well as covering theories of heroin addiction, and medical aspects.

---

**2nd Ed. 1986, Reissue Ed. 1988 • 464 pp.  
ISBN 978-0-89464-325-5 • \$61.25**

---

**HEROIN ADDICTION: Theory, Research, and Treatment - VOL. 2: The Addict, The Treatment Process, and Social Control***by Jerome J. Platt**Foreword by Douglas S. Lipton, Ph.D.*

Volume 2 provides an overview of recent advances in such areas as our understanding of the treatment process, the prevention of relapse, psychopathology as related to treatment outcome, and other issues germane to the treatment of drug abuse in general, and heroin addiction in particular. The role of coercion in treatment, as well as the legalization and normalization of drug use in this and other countries, is addressed. Treatment within the criminal justice system is covered in detail, and recommendations are provided in the areas of drug abuse policy, treatment effectiveness, and research. Volume 2 contains all new material and is cross-referenced with Volume 1, thus expanding and updating it. For the reader's convenience, Volume 2 contains a cumulative author and subject index for Volumes 1 and 2 with over 3500 entries.

---

**Orig. Ed. 1995 • 282 pp. • ISBN 978-0-89464-267-8 • \$46.00**

---

**HEROIN ADDICTION: Theory, Research, and Treatment - VOL. 3: Treatment Advances and AIDS***by Jerome J. Platt**Foreword by A. Thomas McLellan, Ph.D.*

Volume 3 continues coverage of advances made in the past ten years, focusing on the full range of interventions for the treatment of heroin addiction. Non-pharmacological interventions, including cognitive-behavior therapy, therapeutic communities, family therapy, and drug-free interven-

tions are among those covered, as is the treatment of addicted women. Volume 1's comprehensive coverage of pharmacological treatments, including detoxification and methadone, is continued, with particular emphasis on recent evidence concerning the effectiveness of these modalities. HIV and AIDS, as they relate to injection drug use, are covered, as are interventions. Issues related to drug abuse policy, treatment effectiveness, and research are addressed. This volume consists of all new material, is cross-referenced to Volumes 1 and 2, and contains a cumulative author and subject index for Volumes 1, 2, and 3 with over 5000 entries.

---

**Orig. Ed. 1995 • 328 pp. • ISBN 978-0-89464-881-6 • \$53.25**

---

**CONAN DOYLE'S TALES OF MEDICAL HUMANISM And VALUES: Round The Red Lamp***Edited by Alvin E. Rodin & Jack D. Key*

This annotated reprint of Arthur Conan Doyle's *Round the Red Lamp, Being Facts and Fancies of Medical Life*, published in 1894, also contains commentary and notes for an additional six of Conan Doyle's medical short stories as well as the text of an address which he presented to medical students in 1910. Included in these literary vignettes are three Sherlock Holmes stories that are primarily medical in orientation. These vital messages from almost one hundred years ago not only reinforce the present emerging trend of medical humanism, but also graphically portray the psychosocial effects of disease on the afflicted and the healer alike. The book is of interest to medical historians; physicians; students of medicine, allied health groups and medical humanities; and Sherlock Holmes enthusiasts.

**Orig. Ed. 1992 • 496 pp. • ISBN 978-0-89464-571-6 • \$69.25**

---

**MEDICAL CASEBOOK OF DOCTOR ARTHUR CONAN DOYLE: From Practitioner to Sherlock Holmes and Beyond***by Alvin E. Rodin & Jack D. Key*

In addition to recognition in literature, Sir Arthur Conan Doyle should be recognized for his work as a physician and for his medical concepts expressed in various publications. He was a diversified genius and this book endeavors to document his medical facet. Conan Doyle was the creator of a spectacularly popular series of crime-solving adventures involving exploits of Sherlock Holmes and Dr. John Watson, in which medicine was inextricably entwined. He established himself as a versatile author with historical novels, short stories, volumes of poems, plays, histories, science fiction, and publications in occult science, as well as medicine.

**Orig. Ed. 1984 • 506 pp. • ISBN 978-0-89874-592-4 • \$67.00**

---

## MEDICINE, LITERATURE, AND EPONYMS: Encyclopedia of Medical Eponyms Derived From Literary Characters

by Alvin E. Rodin & Jack D. Key

The authors have assembled the first encyclopedic listing of medical names derived from literature, including mythological, scriptural, fictional prose and poetry, children's fables, the performing arts, and comic strips. More than 350 eponyms have been collected and are included in this book. Dip into the book anywhere and you will meet arresting images. This book provides an interdisciplinary amalgamation that can enrich and interest many different disciplines as well as the general public. The book is oriented to physicians, other health care workers, authors, and scholars and students alike.

## The COMPLETE FOOTWEAR DICTIONARY

Edited by William A. Rossi

*The Complete Footwear Dictionary, 2nd. Ed.* has been designed as a valuable and authoritative reference guide for all segments of the footwear industry as well as for medical practitioners involved in footwear. Edited by William A. Rossi, perhaps "the ultimate scholar" in his field, this practical volume can quickly provide information on almost any needed footwear-related terminology. The second edition has added over 800 new terms and 160 illustrations to the nearly 4000 terms and definitions contained in the original edition. Terminology of every known shoe-related subject is covered and fully cross-referenced for easy search. Fabrics and materials, fashion and styling, manufacture and sale, shoe retailing terms, anatomy of the foot and foot health are all addressed, making this the world's most comprehensive dictionary of its kind.

---

2nd Ed. 2000 • 226 pp. • ISBN 978-1-57524-114-2 • \$80.75

---

## The SEX LIFE Of The FOOT And SHOE

by William A. Rossi

With thoroughness and elan, the author takes us on a walking tour through history, from Chinese footbinding to the outrageous distortions of the foot gladly suffered by women over the centuries in the cause of sexual allure. He explores the peculiarly American obsession with "sick" and "tired" feet, and the huge industry that has sprung up to cater to our negativism. He gives an insightful psychosexual guide to people via footwear. This book is a unique piece of social history, a provocative, often witty and always original, inquiry into human behavior.

---

Orig. Ed. 1976, Reprint Ed. 1993 • 272 pp.  
ISBN 978-0-89464-573-0 • \$45.00

---

## HISTORY OF PHYSIOLOGY

by Karl E. Rothschuh

Translated and Edited by Guenter B. Risse

Notable for its use of charts and tables of the growth of physiology conceptually and professionally, Rothschuh's book also explores the general ideas of each period, ending with a challenging discussion of the limits of physical research on biological order. Dr. Risse has aided the reader immeasurably also by his fine bibliography in English which follows each chapter and totals several hundred valuable citations. The many interesting photographs and the generally fine production of this book make it a valuable addition to the collection of one interested in the history of the healing arts.

## CORAL SNAKES Of The AMERICAS: Biology, Identification, and Venoms

by Janis A. Roze

This monographic treatment offers all the basic knowledge about New World venomous coral snakes. It gives full descriptions and keys for identification of all the species and subspecies, with maps of distribution and variation. Also included are morphology, anatomy, color patterns, and folklore. The biology and evolution section includes ecology, food and feeding, reproduction, enemies and defense, biogeography and evolution, with special reference to mimicry and cannibalism. The section on venoms and snakebite surveys characteristics and effects of venom and discusses snakebite accidents, first aid, and remedies. The book contains 63 color photographs.

## OPIOID ADDICTION And TREATMENT: A 12-Year Follow-Up

Edited by D. Dwayne Simpson & S.B. Sells

This book covers a national sampling of 490 heroin addicts who were admitted to community-based treatment agencies in the Drug Abuse Reporting Program (DARP), and who were relocated and interviewed 12 years later. The findings and implications from this research project, which began in 1968 for the purpose of evaluating the effectiveness of community-based drug abuse treatment, are summarized in this text. The material is organized into sections on research design, addiction careers (outcome patterns, death rates, and duration of addiction), treatment histories, predictions of long-range outcomes, factors associated with addiction and relapse, and integrative prediction models providing a comprehensive review of contemporary thought.

## The HEALTHCARE ETHICS COMMITTEE EXPERIENCE: Selected Readings from HEC Forum

*Edited by Stuart F. Spicker*

This anthology includes authors whose original articles appeared in prior issues of *HEC FORUM*. All are active members of health care ethics committees. These authors have been frequently cited in the principal bioethics journals. This presentation makes available, in compact form, the necessary considerations for all committee members who work in long-term care institutions and other professional institutions, as well as those working in the fields of bioethics and health law.

## The LIFE And TIMES Of THOMAS WAKLEY

*by S. Squire Sprigge*

In the early nineteenth century modern medical journalism was created by a London surgeon, Thomas Wakley, founder of the medical journal *The Lancet*. Wakley's goal was to reform as well as to inform, but education was the basic fare. As doctor and medical coroner, he fought medical quackery and injustice. Wakley also served as a member of the British parliament for almost two decades. The story of his life was out of print for three-quarters of a century, but is now available again to remind all who publish in journals what we owe to the combative and innovative Thomas Wakley.

## PROFESSIONAL ETHICS IN NURSING

*Edited by Joyce E. Thompson & Henry O. Thompson*

A collection of essays from a variety of sources, this text presents ethical concerns for nurses. The objectives are to sensitize the nurse and other health professionals to the role that ethics plays in the practice of one's profession, and to provide an overview of professional ethics in the health fields. It poses the moral question of whether nurses should study ethics, and offers teaching strategies for those who decide to learn. The nature of ethical decision making and major issues involved in nursing research and human experiments, which have an ethical base, are explored.

## MULTIPERSPECTIVE CASE FORMULATION: A Step Towards Treatment Integration

*by Priyanthy Weerasekera*

*Foreword by Carolynne D. Darby*

A multiperspective model of formulation is presented to help psychiatry residents assess and treat the disorder or condition presented by an individual. A grid encourages the practice of differential therapeutics and treatment integration. This grid allows an assessment to be made in each area, then a variety of treatments are suggested. Although written specifically for psychiatry residents, this book will help students in medicine, psychology, and social work to treat their patients comprehensively. It also can be used as a teaching tool, either in a seminar or rounds format; the latter of which is being practiced at McMaster University, Hamilton, Ontario, where Dr. Weerasekera teaches and practices.

### **THE KRIEGER STORY**

Krieger Publishing Company was founded in 1969. Its first book, *Artificial Limbs*, was done in collaboration with the Veterans Administration. Since that time, Krieger's publications have encompassed numerous areas of technical sciences, history, adult education, and more.

The firm utilizes special subject editors in history, adult education, and natural sciences including herpetology. Other areas of science are covered by university consultants. The firm owns the following imprints in its specialty areas:

- Professional Practices in Adult Education and Lifelong Learning Series
- Anvil Series
- Public History Series
- Exploring Community History Series
- Orbit Series
- Open Forum Series

All marketing is done in-house by direct mail, journal advertising, and attendance at national and international meetings.

The firm issues brochures on a continuing basis in all disciplines.

Ownership of the firm is held by the family. The physical facilities encompass 11,000 square feet of office space and 32,000 square feet of warehouse space located in Malabar, Florida. The firm can be reached by telephone, fax, e-mail, and through the Malabar postal address.
