

It's Essential to Have a Good Plan

Wheels Up: Airline Business Plan Development is unique because it concentrates specifically on the airline business rather than generic businesses. It incorporates features other plan books neglect. Modern trends are identified and discussed in detail to help the reader understand the importance of creating flexibility within the business plan. Flexibility is vital for an airline to be successful in today's increasingly competitive environment. Failure to understand recent and future trends in a new aviation environment could lead to failure. This second edition is aimed at a variety of readers including academic students, both undergraduate and graduate, business professionals, and entrepreneurs. It concentrates on business plan development suitable for airlines of all sizes, from single-engine single pilot operations to international jet operations. Regardless of a company's size, the main elements of the airline business plan remain the same.

2nd Ed. 2007 148 pp. ISBN 978-1-57524-293-4 \$32.50

John Wensveen earned a Ph.D. in International Air Transport Management from the University of Wales Cardiff (United Kingdom) and a B.A. in Geography and Transportation Land Use Planning from the University of Victoria (Canada). Dr. Wensveen is Managing Director of Airline Visions LLC, a leading aviation consultancy and advisory firm specializing in the development of business plans for start-ups world-wide. Prior to his current role, Dr. Wensveen was one of the founding executive team members and Vice President of International Development at Maxjet Airways—a leading business class airline operating on the trans-Atlantic. Dr. Wensveen was a Professor of Airline Management at Embry Riddle Aeronautical University and is currently an Adjunct Professor of Business at University of Maryland University College. He is coauthor of *Air Transportation: A Management Perspective* and is a regular contributor to the media as an expert analyst on aviation matters.

CONTENTS

 - Purpose of the Non-Disclosure Agreement (NDA)
 - Do I Need a Lawyer?
- Chapter 5: Executive Summary**
 - Executive Summary Defined
 - Main Elements of the Executive Summary
 - The "Do's" and "Don'ts"
- Chapter 6: Business Introduction**
 - Name, Type of Company and Office Location
 - Business Concept
 - Passenger Target Market
 - Destinations Served
 - Source of Financial Backing
 - Current Position of the Company
- Chapter 7: Mission**
 - Mission Statement
 - Vision Statement
- Chapter 8: Strategy**
 - Strategic Planning Methodology
 - What Kind of Airline?
 - The Strategic Action Plan
 - Strategy Implementation
 - Growth and Expansion Strategy
 - Failures in Planning
- Chapter 9: Market Opportunity**
 - Type of Service
 - Market Analysis and Opportunity
 - Airports to Serve
- Chapter 10: Analysis of Market Demand Levels**
 - The Purpose of Forecasting
 - Forecasting Methods
 - Market Demand Levels
- Chapter 11: Proposed Route Structure and Schedule**
 - Purpose of Scheduling
 - Maintaining of Aircraft Equipment
 - Flight Operations and Scheduling of Crews
 - Ground Operations
 - Schedule Planning and Aircraft Assignment
 - Guidelines to Follow
- Chapter 12: Financial Analysis**
 - Income Statement (Expenses)
 - Income Statement (Revenue)
 - Operation Plan
 - Summary Financial Projections for 5-year Business Plan
 - Statistical summary for 5-year Period
 - Return on Investment (ROI)
- Chapter 13: Sales and Promotion Strategy**
 - The Marketing Mix
 - Entry Strategy
 - How Do We Get Passengers?
- Chapter 14: Aircraft Operating Strategy**
 - Route and Strategy Selection
 - Aircraft Selection
 - Aircraft Type Availability
 - Aircraft Capacity
 - Aircraft Range
 - Fleet and Crew Commonality
 - Aircraft Commonality
 - Powerplant Selection
 - Aircraft Performance
 - Aircraft Efficiency
 - Maintenance Issues
 - Hull and Liability Insurance
 - Noise Restrictions
 - Noise & Operational Curfews
 - ETOPS
 - Aircraft Economic and Performance Evaluation
 - The Purchase/Lease Decision
- Chapter 15: Competition and Competitive Response**
 - Main Competitor Identification
 - Identification of Other Competitors
 - Market Strategy
- Chapter 16: Management and Support Team**
 - Management Team
 - Organizational Structure
 - Corporate Culture and the New Workforce
 - Changing Nature of Human Resources
- Chapter 17: Risk Factors**
 - High Barriers to Entry
 - Additional Risk Factors
 - Exit Strategy
 - Regulation and Liberalization Risks

GENERAL AVIATION MARKETING AND MANAGEMENT

by Alexander T. Wells & Bruce D. Chadbourne

The second edition of *General Aviation Marketing and Management* retains the purpose of the first edition: to provide an extensive survey of the role of general aviation in our air transportation system and assess its impact upon the economy. All of the functions in the marketing process are thoroughly covered. The text has been critically reviewed, updated, and revised where appropriate. A comprehensive listing of over 500 general aviation web sites has been added. Like the first edition, this book will benefit the college aviation student who, as a prospective manager, must recognize and appreciate the role of general aviation in the air transportation system and the marketing and management functions of an FBO; the corporate pilot with responsibility for aircraft evaluation; and FBO's engaged in marketing and management.

2nd Ed. 2003 392 pp. ISBN 978-1-57524-192-0 \$72.00

INTRODUCTION TO AVIATION INSURANCE AND RISK MANAGEMENT

edited by Alexander T. Wells & Bruce D. Chadbourne

The third edition of *Introduction to Aviation Insurance and Risk Management* has provided the opportunity to improve the book and extend its life into the 21st Century. Old material has been deleted and newer, more timely material added. Unlike the previous editions a number of industry professionals have contributed to the new version. Despite these changes the primary purpose of the book remains the same—to introduce the basic principles of insurance and risk with their special application to the aviation industry. It has been designed for several similar, yet distinct audiences: the college student, corporate pilots or fixed base operators, and individuals in the insurance business.

3rd Ed. 2007 560 pp. ISBN 978-1-57524-274-3 \$88.75

COMMUTER AIRLINES

by Alexander T. Wells & Franklin D. Richey

Commuter airlines make up the fastest growing segment of the air transportation industry. Since the early 1960s the regional/commuter airline industry has become an integral part of the air transport network in the United States. Since deregulation, the number of regional/commuter passenger enplanements has increased more rapidly than that of the major carriers. This growth is expected to continue as the "majors" turn over more short-haul, low-density routes to the "commuters". This book provides a comprehensive overview of the industry and the primary operating and management functions of a typical commuter airline. Part One presents the origin and development of commuters, the regulatory environment in which they operate, the structure of their industry, and the important role they play. Part Two begins with a description of the FAA certification process and is followed by coverage of market measurement, forecasting, and planning. Part Three addresses the future of U.S. regional airlines.

Orig. Ed. 1996 256 pp. ISBN 978-0-89464-947-9 \$62.50

HELICOPTER BEFORE HELICOPTERS

by E.K. Liberatore

This book covers vertical-rising aircraft as envisioned from the earliest concepts to the period when the helicopter became a practical machine in the late 1930s. It focuses on the many pioneering ideas and efforts that led to the creation of today's modern helicopter and it explores possibilities for the future. Inside are over 200 illustrations and an encyclopedic glossary that enables the reader to understand the development of the technology and procedures. It is intended for professionals, students, and the increasing body of aviation enthusiasts and conservators.

Orig. Ed. 1998 320 pp. ISBN 978-1-57524-053-4 \$73.00

"... extremely informative and comprehensive... for the aircraft enthusiast or those intrigued by aviation history."—*Borger News-Herald*
