

**Krieger Publishing is proud to announce  
the release of the English Edition of  
*Aquarium Plants* by Christel Kasselmann**

ISBN 1-57524-091-2 528 pp. \$63.50

**T**ranslated from the popular 1999 revised German edition, this text describes the temperature, water, fertilizer, and light needs of more than 300 aquarium plants. Artificial lighting – lamp types, color temperatures, and mounting – is discussed in detail and the author provides advice on choosing the right plants for an aquarium. Ecological factors, flower biology and morphology, and reproduction methods receive detailed coverage. The book contains 525 color photographs with nearly all plants depicted with fully developed submerged foliage. Many of the photographs of rare plants were published for the first time in the German edition. Botanists as well as professional and amateur aquarium keepers will find this book indispensable.

**Christel Kasselmann** passes on her experience from over 30 plant-collecting expeditions in the tropics. She has made several trips to the Americas to study the growing conditions of species of the genus *Echinodorus*, which is her specialty. Kasselmann has written over 150 articles and books about water plants and for 20 years she edited the German aquarium plant magazine *Aqua Planta*.
